

Alaa Obeid

Front End Developer

✉ alaaobeid1@outlook.com ☎ +96181774972 📍 Tripoli, Lebanon

Professional Summary

Enthusiastic and highly motivated front-end developer with a passion for creating engaging and user-friendly web applications. Possesses a strong foundation in React, HTML, CSS, JavaScript, and SQL, with a solid understanding of database management using SQL queries. Demonstrates proficiency through personal projects, showcasing the ability to develop visually appealing, responsive websites. With excellent problem-solving skills, meticulous attention to detail, and a commitment to continuous learning, I am eager to contribute to the success of a dynamic team and further expand my skills in a challenging environment.

Education Background

- Lebanese International University (2021-Present)
Bachelor Of Science In Computer Science:
 - Gpa: 3.7
 - Courses: - Data structures and algorithms
 - Advanced web Development
 - Database Design and Management
 - Software engineering
 - Networking advanced
 - Object-oriented programming
 - Operating Systems

Technical Skills

- React
- HTML5 & CSS3
- JavaScript (ES6+)
- SQL
- Firebase
- Git & GitHub
- Framer Motion
- Java
- Object-Oriented Programming (OOP)
- Redux

Soft Skills

- Problem-Solving
- Adaptability
- Time Management
- Attention to Detail
- Communication
- Continuous Learning

Projects

React meals

- Built a full-stack food ordering application using React and Firebase allowing customers to place food orders
- Implemented features like menu browsing, cart management using context
- Ensured responsive design and optimized performance for a seamless user experience.

Expensify

- Developed a responsive expenses web application using React, HTML, CSS, and JavaScript.
- Implemented features for users to track their expenses in various ways including charts
- Utilized React hooks for state management and data manipulation.
- Ensured responsive design and cross-browser compatibility for optimal user experience.

Wigoz

- Developed a responsive weather web application using pure HTML, CSS, and JavaScript.
- Integrated with a weather API to fetch real-time weather data for user-selected locations.
- Implemented features such as location search, temperature display, and weather forecast.
- Utilized best practices for responsive design and improved user experience

Languages

- English: proficient
- Arabic: Native
- French: Intermediate

Personal Interests

- Attending tech conferences and networking events
- Playing musical instruments
- Fitness
- Exploring new coding frameworks and languages
